

## HyperCore™ Release Notes version 1.2.48

---

### Pan Detection and Coil Behavior

This follow-up update includes a targeted refinement to **pan detection** and coil behavior, to ensure consistently seamless cooking performance.

---

This update will automatically install overnight if your cooktop has an active internet connection. Once the update has been downloaded, you will see a red icon next to **Software** in the settings menu. You can click to install it early.
